## About the conference

The SIAM Conference on Applied and Computational Mathematics is a premier forum for the exchange of ideas and information among researchers and practitioners in the field of applied and computational mathematics. The conference provides a unique opportunity for scientists and engineers to present their latest research findings, discuss current trends, and explore new directions in the field. The conference is held annually and is one of the largest and most influential conferences in the field of applied and computational mathematics.

## Schedule of Events

The conference schedule is designed to provide a comprehensive overview of the field of applied and computational mathematics. The schedule includes a variety of events, including keynote presentations, plenary sessions, and technical sessions. The keynote presentations are given by leading experts in the field and provide a high-level overview of current research. The plenary sessions are held in the afternoon and provide an opportunity for researchers to discuss their work in more detail. The technical sessions are held in the morning and afternoon and provide a forum for researchers to present their work and discuss it with their colleagues.

## SIAM Student Chapters

SIAM Student Chapters are a vital part of the SIAM community, providing a forum for students to present their research and to interact with their peers. The chapters are organized at the university level and are led by student officers. The chapters provide a variety of activities, including seminars, workshops, and social events. The chapters are an excellent way for students to gain experience in organizing and presenting research, and to build a network of contacts in the field of applied and computational mathematics.
