Syllabus (ECON 3070-003)

Spring 2013

## Prerequisites:

The prerequisites for this course are

Economics Prerequisites: ECON 1000 or 2010
Mathematics Prerequisites: ECON 1078 & 1088
or MATH 1300 or MATH 1310 or MATH 1081 or MATH 1080 & 1090 & 1100 or APPM 1350 or equivalent

The models covered in this course require calculus. It is assumed that every student is familiar with derivatives.

## Grading:

Your final grade will be depended on the maximum of the following two calculations:

Problem Sets	15%
In-class Activities	15%
Two Midterm	40%
Final Exam	30%

Problem Sets	15%
In-class Activities	15%
Your highest	30%
Midterm	
Final Exam	40%

The second calculation means that if you "mess up" (or miss) either of the midterm exams (but not both), that test will automatically be dropped, and the comprehensive final is weighted more heavily in this case.

<u>Problem Sets</u>: Throughout the semester, I will periodically assign problem sets to give you the opportunity to practice the material from lecture. These will be directly related to the material from the lecture and they will be designed to give you ample amounts of practice in completing the types of problems you will encounter on exams. PROBLEM SETS WILL NOT BE ACCEPTED LATE.
